PATENTIN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Patent No.: 7,218,966 Docket: GUID.608PA
Issue Date: May 15, 2007 Patentee: Paul Haefner
Title: MULTI-PARAMETER ARRHYTHMIA DISCRIMINATION

CERTIFICATE UNDER 37 CFR 1.8: The undersigned hereby certifies that this correspondence and the papers, as described hereinabove, are being deposited in the United States Postal Service, as first class mail, in an envelope addressed to: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450, on May 22, 2007.

REQUEST FOR CERTIFICATE OF CORRECTION

Certificate of Correction Branch
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Certificate
JUN 05 2007
of Correction

Sir:

It is requested that a Certificate of Correction be issued correcting printing errors appearing in the above-identified United States patent. Two copies of the text of the Certificate in the suggested form are enclosed.

- ☒ As some of the errors listed are due to Applicant's mistake, please charge Deposit Account No. 50-3581 (GUID.608PA) in the amount of \$100.00 to cover the Certificate fee.
- ☐ As none of the errors listed is due to Applicant's mistake, no fee is necessary in connection with this Certificate.

05/31/2007 TRESKAM 38000048 333501 7013966
01 FC:1811 10C.GS DR

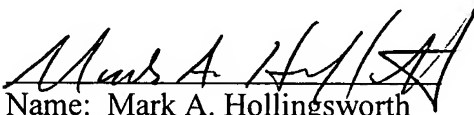

JUN - 5 2007

Issuance of the Certificate of Correction should not expand or contract the scope of the claims, and re-examination should not be required.

Respectfully submitted,

HOLLINGSWORTH & FUNK, LLC
8009 34th Avenue South, Suite 125
Minneapolis, MN 55425

CERTIFICATE OF CORRECTION

PATENT NO. : 7,218,966
DATED : May 15, 2007
INVENTOR(S) : Paul Haefner

PAGE 1 **of** 1

It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

In the References Cited:

“WO 03/020387” should be --WO 03/020367--

In the Abstract:

An arrhythmia discrimination device and method involves receiving electrocardiogram signals and non-electrophysiologic signals at subcutaneous locations. Both the electrocardiogram signals and non-electrophysiologic signals are used to discriminate between normal sinus rhythm and an arrhythmia. An arrhythmia may be detected using electrocardiogram signals, and verified using the non-electrophysiologic signals. A detection window may be initiated in response to receiving the electrocardiogram signal, and used to determine whether the non-electrophysiologic signal is received at a time falling within the detection window. Heart rates may be computed based on both the electrocardiogram signals and non-electrophysiologic signals. The rates may be used to discriminate between normal sinus rhythm and an arrhythmia, and used to ~~determining~~determine absence of an arrhythmia.

In the Specification:

Col. 8, line 36: “circuitry 202 in cases” should be --circuitry 204 in cases--.
